

MazikCare Provider Link Module

Empowers physicians and care teams to collaborate seamlessly, improving patient outcomes

Primary Care Physician

David needs to find more specialist practices where he can refer his patients.

Marketing

Jane needs to identify potential referring physicians and develop strong relationships.

MSO Staff

Amy needs an efficient way to onboard physicians to make them productive as quickly as possible.

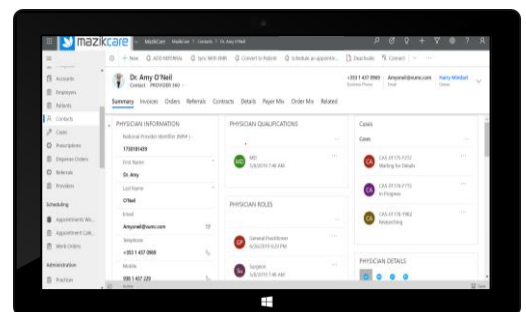

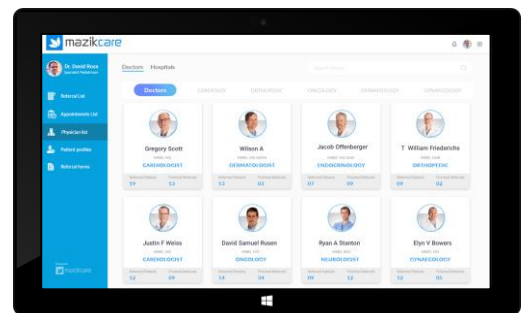

THE SOLUTION

MazikCare Provider Link's end-to-end provider relationship system covers needs at all stages, from marketing to referrals.

- **Physician Recruitment** – With Provider Link, healthcare organizations can boost patient referrals by expanding service offerings. Build dynamic provider target segments based on clinical datasets from Medicare or other sources. Automate marketing campaigns to recruit referring providers. Create healthcare-specific lead scoring models to evaluate leads.
- **Provider Engagement** – Provider Link standardizes provider onboarding processes to ensure a smooth relationship between healthcare organizations and referring providers. Automate welcome emails, calls, and other onboarding tasks. Validate credentials and document preferences. Monitor relationship health scores and proactively nurture disengaged physicians.
- **Referral Management** – Provider Link streamlines workflows for managing referral intake processes and outbound referrals to ensure patients receive the services they need. Referrals can be received and queued from any channel. Digitize paper fax referrals in D365 with MazikCare's AI Scanner app. Complete automated insurance prior authorization. Schedule referred patient services, including appointments, prescriptions, and lab orders.

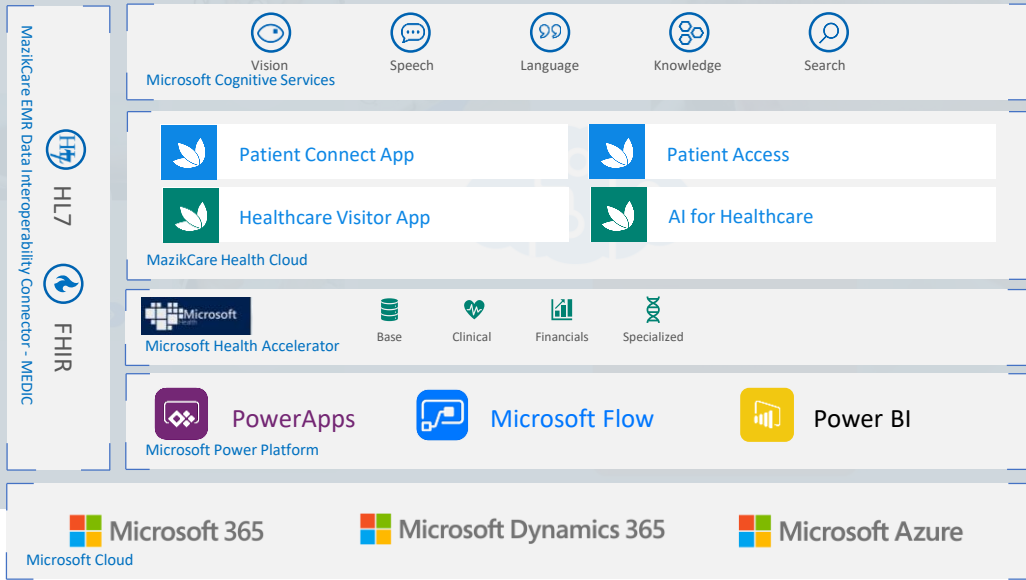

THE BENEFITS

- ✓ **Attract providers** with robust marketing targeted by specialties, patient volumes by CPT codes, payer mixes, and more
- ✓ **Engage physicians** through streamlined provider onboarding and relationship insights in unified provider profiles
- ✓ **Increase patient appointments** with digital referrals and automated service scheduling workflows
